PROFESSIONAL SUMMARY

Software developer with experience in full-stack projects, API integration, and scalable system architecture. Specialist in modern front-end development with React, TypeScript, and Vite, as well as Node.js and Go back-end development, using microservices, webhooks, and Docker deployment automation. Hands-on experience with multi-tenant systems, asynchronous processing with Redis, and integration of e-commerce, payment, and social media platforms.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Go, Python, SQL

Front-end: React 18, Vite, Bun, Tailwind CSS, Radix UI, Framer Motion, React Router, React Query, Zod, React Hook Form

Back-end: Node.js, Express, Go (Gin), Supabase, PostgreSQL, Redis, REST API, Webhooks, JWT, HMAC, C#, .NET

Integrations: Meta / Instagram Graph API, Stripe, AbacatePay, Magazord, GoHighLevel, Supabase API

Infrastructure: Docker, Docker Compose, Nginx, Vercel, CI/CD, VPS Deployment, Deployment Automation with Python

Tools & Methodologies: Git, GitHub, ESLint, Vitest, Playwright, Scrum Ban, Functional QA, UX Testing

PROFESSIONAL EXPERIENCE

Resolutoo — Front-end Developer / React Developer (Freelance)

August 2025 – Present

- Led development of an SPA interface for a tax management dashboard.
- Implemented navigation with React Router and data management with React Query.
- Structured reusable components in `src/components/` and `src/components/ui/` following a custom design system.
- Used Tailwind CSS, Radix UI, Lucide React, Framer Motion, and Recharts for visualization, animations, and accessibility.
- Adopted data validation with Zod and reactive forms with React Hook Form.
- Configured build and development environment with Vite, ESLint, and Vitest, ensuring code quality and performance.

Nesse V2 — Back-end Developer / Integration Engineer (Freelance)

December 2025

- Developed a modular backend service in Node.js with Express to orchestrate data synchronization.
- Implemented integration with external Magazord APIs and sent events to GoHighLevel.
- Designed webhook endpoints and a cron route for real-time processing and periodic execution in a serverless environment.
- Implemented persistence and idempotency control using Supabase.
- Handled data transformation and normalization between heterogeneous systems, including contact formats and order statuses.
- Ensured flow robustness and reliability through service layers and centralized error handling.

Live Commerce — Full Stack Developer / Software Engineer (Freelance)

February 2026 – Present

- Contributed to a SaaS live commerce application for Instagram/Facebook with a Go backend and a React + Bun dashboard.
- Implemented a modular backend architecture with Gin, pgx, Viper, Redis, and AES-256 secrets encryption.
- Developed multi-tenant support, Row-Level Security (RLS) in PostgreSQL, and tenant-aware middleware for secure authentication and authorization.
- Built webhook pipelines for Meta Graph API, Stripe, and AbacatePay, with HMAC signature validation and asynchronous processing via Redis Streams.
- Created deployment and operations automation with Docker Compose and Python scripts for VPS deployment and monitoring.
- Built the front-end dashboard with React, TypeScript, Tailwind CSS, shadcn/ui, TanStack Query, and front-end testing.

EDUCATION

Bachelor's Degree in Systems Analysis and Development

UNIPÊ — 2022 – 2024 (Completed)

CERTIFICATIONS

Goethe-Zertifikat A1 — Goethe-Institut (2024)

LANGUAGES

Portuguese: Native · Spanish: B2 · English: A2 · German: A2

CAREER OBJECTIVE

Seeking positions such as Full Stack Developer, Software Engineer, or Back-end Developer on teams building SaaS products, robust APIs, and e-commerce platforms with external system integrations. Strong background in microservices architecture, deployment automation, webhooks, and payment systems.
